

VideoForensic AI - Forensic Analysis Report

Automated video evidence examination

Property	Value
Filename	641958b3ace94a9b8eadf1fc1cfd30cd.mp4
File size	0.47 MB
Resolution	576x1024
FPS	30.0
Frame count	150
Duration	5.0 sec
Container	MP4
Video codec	H264
Pixel format	yuv420p
Creation time	Unknown
SHA-256	b2cdea61d8d5483c8c151c5ea53a71b4279b4cbd7944e023d7c272c84a05850a
Risk score	30/100
Classification	LOW RISK

Frame-Level Analysis

Metric	Value
Sampled frames	5
Average frame difference	5.041
Repeated/near-identical transitions	2
Abrupt-change transitions	0
Low-blur-score frames	0
Suspicious segments	0
Evidence frames saved	0

Suspicious Segments

No suspicious segments were identified by the configured heuristics.

Audio Analysis

Property	Value
Status	No audio stream detected
Stream count	0

Tampering Detection Indicators

Type	Severity	Observation
repeated-frame	medium	2 sampled frame transition(s) appear repeated or near-identical.
audio	info	No audio stream was detected; audio continuity cannot be assessed.

Evidence Frames

No evidence frames were generated.

Forensic note: This report records automated indicators generated by the current software. It does not establish authenticity, authorship, intent, or legal conclusions. Findings should be corroborated with the original evidence, chain-of-custody records, validated forensic tools, and expert examination.
